Summary

Versatile business professional with over 4 years of experience spanning business analysis, account management, business development, customer success, and technical support. Holds a Master of Science in Business Analytics and a Bachelor's degree in Computer Engineering. Skilled in leveraging data-driven insights to optimize business processes, solve complex technical challenges, develop client relationships, and identify revenue-generating opportunities. Combines strong analytical and technical expertise with consultative sales and relationship management skills to drive operational efficiency, business growth, and exceptional customer experiences.

Professional Experience

Account Executive | Newfi Lending | Chandler, AZ | 08/2026 – Present

- Manage and support mortgage broker accounts by identifying client needs, resolving loan scenario challenges, and recommending appropriate lending solutions.
- Analyze complex borrower scenarios and product guidelines to identify qualification requirements, documentation needs, and potential issues.
- Collaborate with underwriting, operations, and account management teams to troubleshoot client issues and support efficient loan processing.
- Utilize CRM and internal lending platforms to manage client relationships, track opportunities, document interactions, and maintain accurate pipeline information.

Business Analyst | WiddyUP | 2025 – 2026

- Analyze fundraising performance and user engagement data to identify trends, optimize campaign outcomes, and support data-driven decision-making
- Collaborate with cross-functional teams to improve product workflows, enhance user experience, and track key KPIs (active participants, conversion rates, campaign performance).
- Partnered with product, marketing, and customer success teams to improve platform adoption and fundraising performance through data-driven recommendations.

Technical Support Specialist (Documentation & Systems) | Grand Canyon University | 2024 – 2026

- Maintain and update internal websites, documentation platforms, and system procedures to ensure accurate information and support organizational workflow
- Troubleshoot technical and system issues while collaborating with IT and cross-functional teams to improve system usability, data accuracy, and operational efficiency.

Academic Advising Technician | Glendale Community College | 2023 – 2024

- Scheduled and managed 500+ student appointments via Con-Ex Cranium, SIS, and multiple communication channels, ensuring timely academic support.

- Troubleshoot software/equipment and evaluated SIS advisor notes to determine next steps, improving service efficiency and student outcomes.

Project Manager | CashflowNFT (Fintech Platform) |Cyprus| 2021-2023

- Coordinated fintech projects, improving onboarding efficiency by 30% through process automation.
- Built reports and analyzed operational data to monitor project performance, identify bottlenecks, and support business decisions.

Web Development Intern | Atabilisim | Cyprus | 2021 – 2021

- Assisted in developing and maintaining web applications by implementing front-end updates, troubleshooting technical issues, and improving overall website functionality using HTML, CSS, and JavaScript.
- Collaborated with cross-functional teams to test software, resolve user-reported issues, and support system improvements, contributing to a more reliable and user-friendly product.

Core Skills

Analytics: Data Mining, Predictive & Prescriptive Analytics, Forecasting, Regression, Classification, Decision Trees
